ISA Onboarding — Kareem's Training & Ramp Plan (Week 1 to Week 4)

Audience: Kareem (the new ISA), Aaron (manager), Mike (co-trainer). **Purpose:** A robust, interactive training plan for Kareem's first four weeks. Reading the SOPs is not enough — this doc layers training videos, daily checkpoints, written quizzes, practical roleplays, and Mike+Kareem collaboration on top of the SOP reading so Kareem can demonstrate competence, not just exposure.

Companion doc: [ISA-ONBOARDING-WORKBOOK.md](#) — the fillable quiz pages. Print and hand to Kareem each morning. Aaron + Mike grade.

The KPI Kareem is being trained against

Metric	Target	Why this number
Signed contracts/month	4	The North Star — what success looks like
Set appointments/week	7-10	Floor for hitting 4 contracts at industry-standard 9-14% appt-to-contract conversion
Appointments/day cruise	1.5-2	Reverse-math: 7-10/week ÷ 5 working days
Daily dials cruise	100-120	Across both FTM and Bulk Top-250 queues

Onboarding is over when Kareem hits 7+ set appointments in a single week, sustainably. Target = end of Week 4.

Pre-Day-1 setup (Aaron handles before Kareem starts)

Tooling

- ☐ Smrtphone account provisioned and integrated with REISift
- ☐ Smrtphone outbound caller ID configured to Wright Home Offer's local Ohio number
- ☐ DataSift user account for Kareem with access to all OH presets (00 Niche + 01 Bulk folders) + bulk Top-250 lists
- ☐ REISimpli webform URL bookmarked + login credentials provisioned
- ☐ Added to the team group text thread (Aaron + Danielle + Mike + Kareem) — primary channel for all internal coordination
- ☐ Google Drive access to `/docs/ISA/` (this entire SOP folder)
- ☐ Voicemail drop pre-recordings uploaded to Smrtphone (one per preset, 15 sec each)
- ☐ Confirmation SMS templates loaded as Smrtphone quick-replies

Training materials

- ☐ DataSift training video URLs filled in below (Aaron pastes specific links)
- ☐ Fireflies link to 6-10 of Danielle's best Process/Offer calls (handpicked for distinct objection types)
- ☐ Pre-curated dial list for Day 2 (Aaron picks 20 LP records, all Tier 1-2, all <30 days old, mix of empathy + urgency scenarios)

- ☐ Pre-curated bulk Top-250 sample (Aaron picks 30 records from one county for Day 4 bulk-list training)
 - ☐ Printed copies of [ISA-ONBOARDING-WORKBOOK.md](#) — each day's quiz page printed in advance
-

DataSift / REISift Training Video Index

DataSift hosts a training video library inside the platform. Kareem must watch each of these — pacing is in the daily schedule below. **Aaron fills in the URLs** before Kareem's Day 1.

Foundation videos (Day 1 evening homework, ~90 min total)

- ☐ **DataSift platform overview** — [Aaron paste URL]
- ☐ **Records, lists, and tags** — [Aaron paste URL]
- ☐ **Filter presets and how to apply them** — [Aaron paste URL]

Sequential marketing (Day 2 evening homework, ~60 min)

- ☐ **Niche sequential marketing methodology** — [Aaron paste URL]
- ☐ **Bulk sequential marketing methodology** — [Aaron paste URL]
- ☐ **Pendulum theory in lead nurture** — [Aaron paste URL]

Smrtphone integration (Day 3 evening homework, ~45 min)

- ☐ **Smrtphone power-dial setup** — [Aaron paste URL]
- ☐ **Voicemail drop strategy** — [Aaron paste URL]
- ☐ **Call recording + Fireflies integration** — [Aaron paste URL]

SiftMap + skip trace (Day 4 evening homework, ~45 min)

- ☐ **SiftMap property research** — [Aaron paste URL]
- ☐ **Skip trace results — interpreting phone tiers** — [Aaron paste URL]
- ☐ **Bulk distressed list filtering — Top 250 build** — [Aaron paste URL]

Sales-skill videos (Week 2 evening homework, watch one per day, ~30 min each)

- ☐ **TARP — the ghost preventer** — [Aaron paste URL]
- ☐ **UMBC — qualifying without grilling** — [Aaron paste URL]
- ☐ **Boxing objections — the exact order** — [Aaron paste URL]
- ☐ **Verify the no — the rookie killer** — [Aaron paste URL]

- ☐ Same-side selling — leverage from no pricing authority — [Aaron paste URL]

If DataSift's library doesn't have a specific video listed above, Aaron either pulls one from another source (RD's training, YouTube, Cole Ruud-Johnson) or replaces with a roleplay session covering the same content. The point is the topic is covered, not the source.

SOP reading list (Kareem reads these in order during onboarding)

Day read	Doc	Why this order
Day 1 AM	ISA-ROLE.md	What he is and isn't — anchors everything else
Day 1 AM	ISA-SALES-FRAMEWORK.md	The psychology + RD methodology — load-bearing
Day 1 AM	ISA-CALL-SCRIPTS.md	Operationalizes the framework
Day 1 PM	ISA-CADENCE.md	When each script fires
Day 1 PM	ISA-QUALIFICATION-HANDOFF.md	What "qualified" means + REISimpli webform
Day 2 AM	ISA-MIKE-COLLAB.md	Mike+Kareem handshake — read before first joint shift
Day 2 AM	ISA-DAILY-PLAYBOOK.md	How the day flows
Day 2 PM	SOP-DATASIFT-NAVIGATION.md	Mike's DataSift UI walkthrough — the tool surface area
Day 3 AM	SOP-TAG-FLOW.md	The shared tag taxonomy with Mike
Day 3 PM	SOP-CALL-SCRIPTS.md	Original Mike-era scripts (so he knows the lineage and what changed)
Day 4 AM	SOP-DAILY-OPERATIONS.md	Mike's morning playbook — Kareem needs to know what Mike sees so they coordinate
Day 4 PM	SOP-RED-FLAGS.md	What goes wrong + how to spot it

Day 1 — Tuesday, May 5, 2026 (9:00 AM – 6:00 PM ET)

Goal: Frame, tooling exposure, first listening. **No live cold dials.**

Time	Activity	Notes
9:00–9:30	Welcome + role overview with Aaron	Walk through ISA-ROLE.md live. Talk through KPI math (4 contracts/mo).
9:30–10:30	Read ISA-SALES-FRAMEWORK.md cover-to-cover	Aaron available for questions
10:30–11:30	Read ISA-CALL-SCRIPTS.md cover-to-cover	Practice each opener out loud, slow tonality
11:30–12:00	Lunch	
12:00–1:30	Listen to 4-6 recorded Danielle calls (Aaron pulls from Fireflies)	Take notes — what makes her openers land, where TARP is set, how she handles objections
1:30–2:30	Tooling walkthrough with Aaron	Smrtphone power-dial, DataSift presets + tags, REISimpli webform submission, group-text escalation protocol
2:30–4:30	Roleplay session with Aaron	Aaron plays prospect (4 distress states: denial, suspicion, decision-fatigue, magical-thinking). Kareem reads scripts
4:30–5:00	Read ISA-CADENCE.md + ISA-QUALIFICATION-HANDOFF.md	
5:00–5:30	Day 1 Quiz (Workbook page 1)	Kareem fills written quiz, Aaron grades on the spot
5:30–6:00	Day-1 debrief with Aaron + first group-text post	What's clear, what's not, biggest worry

Day 1 evening homework (~90 min, on Kareem's own time): watch the 3 Foundation training videos.

Day 1 success criteria (must hit ALL before Day 2 starts): - ☐ Quiz score 80%+ (Workbook page 1) - ☐ Recites the Help-Frame Opener from memory in his own voice - ☐ Names all 8 Distress States and what each sounds like - ☐ Names TARP's 4 elements without looking - ☐ Submits a test REISimpli webform with a dummy lead - ☐ Posts first group-text message to the team thread

Day 2 — Wednesday, May 6 (9:00 AM – 6:00 PM ET)

Goal: Shadow Aaron live + Kareem's first 5-10 supervised dials. Mike joins for the afternoon to introduce the collab handshake.

Time	Activity	Notes
9:00–9:15	Read ISA-MIKE-COLLAB.md + ISA-DAILY-PLAYBOOK.md	
9:15–9:30	First morning group-text post (Kareem drafts, Aaron reviews before sending)	
9:30–11:00	Shadow Aaron live-dialing (8-10 calls)	Kareem listens silently, takes notes, no input
11:00–11:30	Debrief: what Kareem heard, what worked, what surprised him	
11:30–12:00	Read SOP-DATASIFT-NAVIGATION.md	
12:00–12:30	Lunch	
12:30–1:00	Mike joins — introduces himself, walks through the SMS side of a Day 1 sequence, shows Kareem the tag handshake from Mike's side	
1:00–1:15	Mid-day group-text sync (Kareem drafts)	
1:15–3:30	Kareem's first 5-10 supervised dials	Aaron beside him on every call, taking notes. Mike monitors via Smartphone live-listen for 2-3 of the calls.
3:30–4:30	Per-call debrief — Aaron + Mike both contribute	What worked, what got jammed up, what to try differently
4:30–5:00	Practical Quiz #1 (Workbook page 2) — Mike + Kareem do this together: 4 roleplay scenarios, Mike plays the prospect	
5:00–5:30	DataSift hygiene practice — Kareem updates tags + status on his own dial records	
5:30–6:00	EOD group-text post + Day 2 debrief	

Day 2 evening homework (~60 min): watch the 3 Sequential Marketing training videos.

Day 2 success criteria: - [] Quiz #1 score 80%+ (Mike + Aaron grade) - [] Completes the Help-Frame Opener at least 3 times verbally on live calls - [] Identifies at least 1 distress state correctly during a real call - [] No hard flags (no price quotes, no “other offers,” no skipped Permission-to-say-no) - [] Posts morning + mid-day + EOD group texts to the team thread

Day 3 — Thursday, May 7 (9:00 AM – 6:00 PM ET)

Goal: Solo FTM dial blocks, Aaron monitoring loosely. Read tag taxonomy. Mike co-debrief at EOD.

Time	Activity	Notes
9:00–9:15	Morning group-text post	Independently — Aaron does NOT pre-review today
9:15–9:30	Read SOP-TAG-FLOW.md	
9:30–11:30	Solo FTM Dial Block #1 (target: 25-30 dials)	Aaron monitors via Smrtphone live-listen, available for pause
11:30–12:00	Mid-day debrief + lunch	
12:30–1:00	Mid-day group-text sync	
1:00–3:00	Solo FTM Dial Block #2 (target: 25-30 dials)	
3:00–3:30	Recycle queue review	
3:30–5:00	Solo Block #3 (target: 15-20 dials, including any callbacks)	
5:00–5:30	DataSift hygiene + first REISimpli webform if Kareem connects with qualified lead	
5:30–5:45	Day 3 Quiz (Workbook page 3) — written, 10 questions, mostly tag-flow + handoff procedure	
5:45–6:00	EOD group-text + 15-min Mike co-debrief	What patterns are emerging — what’s Mike seeing on SMS, what’s Kareem seeing on calls

Day 3 evening homework (~45 min): watch the 3 Smrtphone integration videos.

Day 3 success criteria: - [] 50-70 total dials - [] 12+ connects - [] ≥1 UMBC capture (even if not handoff-qualified) - [] Zero hard flags - [] Quiz score 80%+

Day 4 — Friday, May 8 (9:00 AM – 5:00 PM ET)

Goal: First exposure to Bulk Top-250 list. Same-volume FTM in AM, Bulk training in PM.

Time	Activity	Notes
9:00–9:15	Morning group-text post + read SOP-DAILY-OPERATIONS.md	
9:15–9:30	FTM Top-2 prioritization	
9:30–11:30	Solo FTM Dial Block #1 (target: 30-35 dials)	
11:30–11:45	Hot handoffs window	
11:45–12:30	Lunch	
12:30–1:30	Bulk Top-250 walkthrough with Aaron — open the bulk preset folder, explain the rotation cycle, walk through the bulk script vs. FTM script differences	See ISA-CADENCE.md bulk section
1:30–3:30	First Bulk Top-250 dial block (target: 30-40 dials, supervised) — Aaron monitoring, debriefing every 5-10 calls	
3:30–4:00	Read SOP-RED-FLAGS.md	
4:00–4:30	Practical Quiz #2 (Workbook page 4) — Mike + Kareem joint roleplay: bulk-list opener + the 3 most common bulk objections	
4:30–5:00	Week 1 Retrospective with Aaron (30 min phone call)	Numbers, calls, distress-state distribution, what to adjust Week 2

Day 4 evening homework (~45 min): watch the 3 SiftMap + skip trace videos.

Day 4 success criteria: - [] First bulk Top-250 dial completed - [] Recites the Bulk opener from memory - [] Quiz #2 score 80%+ - [] Total Week 1: 100-150 dials, 25-40 connects, 0-1 set appointment (stretch)

Day 5 — Saturday, May 9 (9:00 AM – 12:00 PM ET — 1st Saturday)

Light dial day. Kareem makes 30-40 dials on his own. Aaron available by group text but not present. Mike works SMS in parallel as usual on Saturday.

End of Saturday: Kareem files a brief group text on the team thread: “Saturday block done — X dials, Y connects, Z notes. See you Monday.”

Week 2 (May 11–16) — Calibration & Skill Drills

Goal: Find Kareem’s natural pace. Address scripts that aren’t landing. Reduce Aaron’s hands-on time to 1-2 hrs/day. Mike + Kareem run daily roleplays before the dial blocks.

Week 2 daily structure

Block	Activity
9:00–9:30	Morning group-text post + 15-min Mike+Kareem roleplay drill (one scenario per day from Workbook pages 5-9 — sales-skill drills)
9:30–11:30	FTM Dial Block #1
11:30–11:45	Hot handoffs
11:45–12:30	Lunch
12:30–1:00	Mid-day sync
1:00–3:30	Bulk Top-250 Block
3:30–4:30	FTM Block #2 / recycle queue
4:30–5:30	DataSift hygiene + REISimpli handoffs
5:30–6:00	EOD group text

Week 2 daily checkpoints

Day	Workbook page	Drill focus	Aaron audit
Mon (May 11)	Workbook p.5	TARP fluency drill	—
Tue (May 12)	Workbook p.6	Boxing Objections sequence	One live-listen, 30 min
Wed (May 13)	Workbook p.7	Verify the No drill	First call audit (Workbook p.10)
Thu (May 14)	Workbook p.8	Same-Side Selling phrases	One live-listen, 30 min
Fri (May 15)	Workbook p.9	Silence Control drill	Week-2 retro phone call (30 min)

Week 2 daily targets

- 70-80 dials/day (FTM 35-40 + Bulk 35-45)
- 18-25 connects/day
- 1-2 set appointments/day (target ≥ 7 for the week)
- 0 hard flags

Week 2 evening homework

Watch one Sales-Skill video per evening (~30 min): - Mon: TARP video - Tue: UMBC video - Wed: Boxing Objections video - Thu: Verify the No video - Fri: Same-Side Selling video

Week 3 (May 18–23) — Independence + First Real Yield

Goal: Kareem operates independently. Aaron's involvement = morning standup (15 min), EOD debrief (15 min), one mid-week call audit. Target: 2-3 set appointments/day.

Week 3 daily structure

Same as Week 2, with these changes: - Roleplay drills move from daily to **3x/week** (Mon/Wed/Fri only) - Mike+Kareem 15-min EOD debrief moves to **2x/week** (Tue/Thu only — quieter contact unless something comes up) - Aaron's call audit happens once (Wednesday — uses Workbook p.10 rubric)

Week 3 milestones

Day	Milestone
Mon (May 18)	Workbook p.11 quiz — 25-question comprehensive Week 1-2 review
Tue (May 19)	First independent handoff to Danielle without Aaron review
Wed (May 20)	Aaron's mid-week call audit — full RD scorecard graded
Thu (May 21)	First handoff that becomes a contract (stretch goal — first time Kareem's name appears in a closed deal's chain)
Fri (May 22)	Week-3 retro — review handoff yield, contract pace, what to push in Week 4

Week 3 daily targets

- 90-100 dials/day
 - 22-30 connects/day
 - 2-3 set appointments/day (target 10-15 for the week)
 - 0 hard flags
-

Week 4 (May 25–30) — Cruise Pace + Onboarding Exit

Goal: Kareem hits cruise pace. First closed deal handoff is the onboarding-complete signal.

Week 4 daily structure

Standard cadence. Aaron involvement = weekly only (Monday standup, Friday retro, one mid-week audit).

Week 4 milestones

Day	Milestone
Mon (May 25)	Workbook p.12 — final comprehensive quiz (50 questions, all 4 weeks of training)
Wed (May 27)	Aaron's mid-week call audit — must score 80%+ on RD scorecard for onboarding completion
Fri (May 30)	Onboarding-Exit Review with Aaron — review whether Kareem hit the exit criteria below

Week 4 daily targets

- 100-120 dials/day
- 25-40 connects/day
- 2-4 set appointments/day (target 12-15 for the week)
- 0 hard flags

Onboarding-Complete criteria (graduated from training)

Kareem is considered “onboarded” when ALL of these hit in the same week: - ☐ 7+ set appointments in a single calendar week (the KPI floor, sustained) - ☐ Aaron's call audit scores 80%+ on RD scorecard - ☐ Zero hard flags for 14 consecutive days - ☐ All daily group-text touchpoints (morning / mid-day / EOD) executed every day for 14 days - ☐ At least 1 handoff has converted to a signed contract (Danielle confirms) - ☐ Workbook p.12 final quiz score 90%+

If criteria not met by end of Week 4: extend onboarding by 2 weeks with targeted skill work on the gap.

Coaching cadence (ongoing post-onboarding)

- **Monday morning standup** (group text, 5 min async) — sets weekly priorities
 - **Wednesday mid-week call audit** — Aaron grades 1-2 calls, written feedback
 - **Friday weekly retrospective** with Aaron — 30 min phone call — review numbers, calls, handoff yield, contract pace
 - **Monthly performance review** — handoff-to-contract conversion, contract-to-close conversion, commission earned
-

What gets coached vs. corrected

Coached (improvement areas — addressed via roleplay + audited calls): - Tonality (rushed, scripted-sounding, eager) - TARP fluency (the words flow, don't get read off the page) - UMBC depth (Socratic follow-ups, not face-value motivation) - Boxing Objection sequence speed - Silence control after calibrated questions - Mike+Kareem handshake quality

Corrected (immediate, non-negotiable — same-day intervention): - Cadence misses (>24h overdue callback) - Data hygiene (missing tags, blank notes) - Off-script in a damaging way (price quoted, "other offers" said, identifying as wholesaler) - Buy-box violations (handing off a lead that doesn't fit our criteria) - Skipping the daily group-text touchpoints

Smrtphone-specific things Kareem needs to know

- **Local presence dialing** is on by default. Outbound calls show a local Ohio number to maximize answer rate.
 - **Voicemail drop** is enabled — Kareem can pre-load a 15-sec VM per preset and trigger it during power-dial without speaking.
 - **Call recording** is on for every outbound call. Kareem should not say anything on a call he wouldn't want Aaron, Danielle, Mike, or a TCPA auditor to hear.
 - **DNC list** is auto-synced from DataSift `do_not_contact` tag. Kareem still verifies before any dial — manual STOP requests during a call get tagged immediately.
 - **Power-dial line count**: 3-line default during dial blocks; drop to 1-line for probate Day 1 (never power-dial a grieving family).
 - **Live-listen** — Aaron and Mike can join Kareem's calls in listen-only mode for coaching. Used during Week 1-2.
-

DataSift-specific things Kareem needs to know

- Mike's SMS work and Kareem's dial work happen on the **same records**. Coordination is via tags + the daily group-text dialogue (see [ISA-MIKE-COLLAB.md](#)).
- Tags Kareem applies: `dial_day_N`, `connected`, `voicemail_left`, `callback_scheduled`, `kareem_active_call`, `kareem_done`, `not_yet`, distress-state tags (`distress_shame` etc.), `qualified_handoff_danielle`, `qualified_handoff_aaron`, `listing_pivot`.
- Tags Mike applies: `mike_active_sms`, `mike_paused`, `mike_done`, `sms_sent_day_N`, `responded`, `requested_info`, `interested`. Kareem **reads** these to know if Mike already heard from the prospect today.
- The `Notes` field in DataSift gets a 1-line update from Kareem after every connect.

REISimpli-specific things Kareem needs to know

- **Webform submission is the only handoff path.** No email, no phone-tag with Danielle.
 - Lead Source field is **mandatory** — `SiftStack ISA – [preset]` . Drives Danielle's pipeline filtering.
 - Notes field uses the template in [ISA-QUALIFICATION-HANDOFF.md](#).
 - After webform: group text the team thread tagging Danielle immediately with property address + 1-liner. Don't wait.
-

Things Kareem should NOT do (common new-rep mistakes)

- **Don't quote a price.** Ever. Even hypothetically. Same-Side framing requires zero pricing authority.
 - **Don't argue with denial.** Parallel-track instead.
 - **Don't push a probate lead in active grief.** Back off, recycle, send the SMS summary, wait.
 - **Don't tag Dead.** Re-status only. Every "no" gets verified.
 - **Don't fill silence.** After a calibrated question, after the offer's been mentioned, after a label — wait. 4 seconds minimum. 8-10 is better.
 - **Don't say "other offers."** Always "other options."
 - **Don't identify as a wholesaler.** Wright Home Offer closes on its own contracts.
 - **Don't skip Permission-to-say-no.** It's the load-bearing piece of TARP.
 - **Don't skip Mike+Kareem touchpoints.** The tag handshake breaks down without the dialogue.
 - **Don't dial a record without checking tags.** If `mike_active_sms` is on it, skip.
-

What Kareem can ping Aaron about anytime

- Stuck on an objection that's not in the scripts
- Unclear distress-state read
- Tooling failures (Smrtphone, DataSift, REISimpli down)
- A high-value lead that feels like Aaron should take directly
- An ambiguous DNC / TCPA scenario
- Mike+Kareem disagreement that doesn't resolve in 30 minutes

What Kareem should NOT ping Aaron about: - Standard objections (use the scripts) - DataSift tag confusion (read SOP-TAG-FLOW.md or ask Mike) - DialForce scheduling / pay (route to DialForce

ops, not Aaron)
