

SOP — Daily Outreach Cadence by Preset

Audience: Mike (text outreach), future caller (phone outreach), Aaron (closer).
Purpose: Day-by-day playbook for working each preset. Tells Mike exactly what to do on Day 1, Day 2, Day 7, Day 30 — across SMS, phone, mail. Frames every touchpoint as "we have options to help" — not a sales pitch.

Core philosophy — we lead with options, not offers

Distress homeowners get pitched constantly by wholesalers and predators. What sets us apart is the **first sentence**:

"I'm a local buyer in your county. Based on where your situation is now, I can present a few options — not all of them require selling. What's worth knowing?"

That single framing changes the response rate dramatically. We're consultative, they pick the path.

The 4 options we always have:

Option	When it fits	What we do
Cash sale	Owner wants speed + cash, no equity to fight for	Buy as-is, close 7-14 days, no fees
Fund redemption	Already past sheriff sale, redemption window open	Provide cash to redeem, then buy from them — they walk away with money instead of nothing
Refer to attorney / loan mod	Owner has equity + wants to keep house	Free referral to bankruptcy attorney or loan mod specialist; we don't profit, we win goodwill
Just answer questions	Confused / overwhelmed	Free 10-min phone call to explain the foreclosure process, what comes next, what their rights are

Mike's script always opens with "I have a few options to help" — never "I want to buy your house".

Universal cadence framework

Every distress lead gets this base cadence unless they STOP, convert, or hard-decline:

Day 0 Records lands in DataSift (autonomous)
Day 1 SMS – opening message + "options to help" framing
Day 2 SMS – soft follow-up if no response Day 1
Day 3 SMS – final urgency (event-based: sale date, court deadline)
Day 4 Phone call attempt (Tier 0-2 numbers only)
Day 7 SMS – nurture check-in
Day 14 Phone call attempt #2 + mailer #1
Day 30 Phone call attempt #3
Day 60 Mailer #2
Day 90 Recycle through cadence (only for status=Dead, never for status=Sold)

Cadence overrides per preset: see each preset section below. The above is baseline.

When to STOP the cadence

Stop touchpoints permanently for any of these:

- 🖐️ **Reply STOP** — TCPA opt-out. Tag `do_not_contact` . Never message again.
 - 🖐️ **Status: Sold** — sold to someone else. Tag `Sold` . Sold Property Cleanup sequence fires.
 - 🖐️ **Status: Closed** — we closed the deal. Move to post-close workflow.
 - 🖐️ **Hard decline + reason** — "I'm staying, my son's moving back." Note in Notes, recycle in 90 days only if reason changes.
 - 🖐️ **Returned mail (3x)** — bad address. Tag `bad_address` , drop.
-

Preset-Specific Cadences

§1-3. Lis Pendens — Montgomery / Franklin / Greene

Situation: Foreclosure case JUST filed in Common Pleas. Sheriff sale is 4-12 weeks away. Homeowner is in early panic mode. **They have the most options of any distress lead — most time, most leverage, most paths forward.**

Tone

Calm, advisor-mode. Not urgent yet. Lead with "you have time and options" — distinguishes us from sheriff-sale-day vultures.

Cadence

Day	Action	Channel	Template/Script
Day 1	Send opening SMS — "options to help" frame	SMS	SOP-SMS Templates §1/§2/§3 Day 1 primary
Day 2	Soft follow-up if no response	SMS	§1/§2/§3 Day 2
Day 3	Brief "options" reminder, no urgency	SMS	§1/§2/§3 Day 3
Day 4	First phone call (Tier 0-2 only)	Phone	LP phone opener (below)
Day 7	Nurture text — share resource	SMS	"Hey {{first}}, FYI Ohio has a 30-day right-to-cure window after lis pendens. Here's what that means: [link]. {{phone}} if questions."
Day 14	Second phone attempt + mailer #1	Phone + Mail	Mail piece: "Options Letter — Lis Pendens Filed"
Day 21	Third phone attempt	Phone	Reference any conversation, sale-date check
Day 30	Update — has sheriff sale been scheduled yet?	SMS	"{{first}}, has a sheriff sale date been set yet on {{address}}? Wanted to check in."
Day 60	Mailer #2 + final phone attempt	Phone + Mail	Mail piece: "Final Options Before Sheriff Sale"
Day 90	Move to nurture-only quarterly mailer	Mail	Quarterly check-in piece

LP Phone Opener (Day 4)

"Hi {{first}}, this is {{me}} from Wright Home Offer in {{county}} County. I saw your foreclosure case was filed and I wanted to reach out — not because I'm trying to sell you anything, but because I work with folks in your spot every day and there are usually 3-4 options most people don't know about. Do you have 5 minutes? I'm happy to walk through them and you can pick the right path for you."

Key phrases:

- "Not trying to sell you anything"
- "3-4 options most people don't know about"
- "You can pick the right path"

Solutions to offer in LP conversation

1. **Cash sale** — fastest, walk away clean (best if they're underwater or burnt out)
2. **Refer to attorney** — bankruptcy buys time + can sometimes save the house (best if they have equity + want to fight)
3. **Refer to loan-mod specialist** — modify the existing mortgage (best if income recovered)
4. **Refer to HUD counselor** — free government counseling (always offer, builds trust)

Escalate to Aaron when

- Lead has property worth >\$300K with significant equity
 - Lead wants to sell + close within 21 days
 - Lead has multiple properties (potential portfolio play)
 - Lead asks "what's your offer?"
-

§4-6. Sheriff Sale — Montgomery / Franklin / Greene

Situation: Sheriff sale is on the calendar. Days-to-sale dictates urgency. **Time pressure is the dominant force in every conversation.**

Tone

Direct + urgent + pragmatic. Not panicked. Confidence: "I can close before the sale, here's how."

Cadence (>21 days to sale)

Day	Action	Channel	Template/Script
Day 1	Opening SMS — calm urgency	SMS	§4/§5/§6 Day 1
Day 2	SMS follow-up	SMS	§4/§5/§6 Day 2
Day 3	Phone call attempt #1	Phone	SS phone opener (below)
Day 5	SMS check-in	SMS	"{{first}}, did you see my texts? {{address}} sale {{auction}} is coming. Quick chat?"
Day 7	Phone attempt #2	Phone	Same opener, alternate voicemail
Day 14	Mailer #1 + phone attempt #3	Phone + Mail	Mail: "{{auction}} sheriff sale — your options"
Day 21	SMS — explicit deadline reminder	SMS	"{{first}}, {{auction}} is now ~3 weeks out. After that the bank owns it. {{phone}} for options."

Cadence (<21 days to sale — URGENCY MODE)

When `auction_date - today < 21 days` :

Day	Action	Channel	Template/Script
Day 1	Opening SMS — urgency variant	SMS	§4/§5/§6 Day 1 urgency variant
Day 1 (PM)	Phone call attempt #1	Phone	Same-day call after SMS
Day 2	SMS + Phone	SMS + Phone	Both, different times of day
Day 3	Phone + voicemail	Phone	Urgency voicemail
Day 5	SMS — deadline math	SMS	"{{first}}, {{auction}} = X days. Last chance. {{phone}}."
Day 7	Final phone attempt + email if available	Phone + Email	"Pre-Sheriff-Sale Cash Offer" email
Day until sale	Daily SMS	SMS	"Day X before {{auction}}. Still time to act. {{phone}}."

SS Phone Opener (Day 3)

"Hi {{first}}, this is {{me}} from Wright Home Offer. I'm calling because your property at {{address}} is set for sheriff sale on {{auction}}, and I wanted to make sure you know your options before that. Do you have 2 minutes? I'm not here to pressure — I just want to make sure you understand what happens after sale and what you can still do before."

Solutions to offer in SS conversation

1. **Cash sale before sale** — most common path. We close in 7-10 days, payoff to bank, clean transaction.
2. **Negotiate with bank for short payoff** — if they're underwater, we can help structure
3. **Refer to attorney for emergency Chapter 13 filing** — last-resort but can stop the sale
4. **Help them prepare for redemption window** — if sale happens, they have OH redemption rights

Escalate to Aaron when

- Sale is <14 days out + lead expresses any willingness
- Property has clear equity (Zestimate > likely payoff)
- Lead says "yes" to a meeting

§7-9. Probate — Montgomery / Franklin / Greene

Situation: Talking to the **executor / personal representative** (named in court record). Their family member just died. They're grieving + dealing with a thousand admin tasks. **Empathy is non-negotiable.**

Tone

Empathic. Soft. NEVER urgent on Day 1. We're patient — probate is a 6-9 month process.

Cadence

Day	Action	Channel	Template/Script
Day 1	Opening SMS — condolences first	SMS	§7/§8/§9 Day 1
Day 3	Soft follow-up	SMS	§7/§8/§9 Day 2
Day 7	Nurture text — no pitch	SMS	"{{first}}, hope the week's been manageable. No pressure on {{address}} — just wanted to check in."
Day 14	First phone attempt	Phone	Probate phone opener (below)
Day 30	Mailer #1 — empathy-led	Mail	Mail: "Selling Estate Property — Your Options"
Day 45	Phone attempt #2	Phone	Reference court timeline ("how's the estate process going?")
Day 60	SMS check-in	SMS	"{{first}}, things settling down? When ready to talk about {{address}}, I'm here."
Day 90	Phone attempt #3 + mailer #2	Phone + Mail	"Probate Closing Soon — Final Options"
Day 120	Quarterly mailer schedule	Mail	Until probate closes

Probate Phone Opener (Day 14)

"Hi {{first}}, this is {{me}}. I sent a couple texts a couple weeks back about {{decedent}}'s estate. I know dealing with everything after losing someone is overwhelming. I'm not calling to sell anything — I just wanted to introduce myself in case you ever want to talk through options on the property at {{address}}. Even if it's months from now, you have my number. Anything I can help with today?"

Why this works:

- "Not calling to sell anything" disarms the wall
- "Even if it's months from now" — respects their timeline
- "Anything I can help with today?" — opens space for THEM to lead

Solutions to offer in Probate conversation

1. **Cash sale (most common)** — estate gets clean cash to distribute among heirs
2. **Refer to probate attorney** — if they don't have one (we know reliable ones)
3. **Help with property cleanout** — even if they don't sell, we have contractors who can clear estate items

4. **Wait for them** — sometimes the right answer is "I'll check back in 6 months"

When NOT to push a probate lead

- They mention recent funeral (within 2 weeks)
- They say "we're still figuring things out" — back off, recycle in 30 days
- Multiple heirs in conflict — flag to Aaron for negotiation handling

Escalate to Aaron when

- PR has Letters of Authority issued + says "yes, I want to sell"
- Property is vacant + costs money to maintain
- Multiple heirs willing to sell collectively
- Property has high value (>\$300K) — Aaron handles direct

§10. Redemption Window (post-sheriff-sale)

Situation: Sheriff sale already happened. In Ohio, the homeowner has a **redemption period** (varies — typically 0-180 days depending on case type) where they can buy the property back from the sale buyer. **Most don't realize this is possible.** Our angle: educate + offer to fund the redemption.

Tone

Educational + helpful. They feel like they've already lost. We're the messenger of "wait, you might still have a path."

Cadence

Day	Action	Channel	Template/Script
Day 1 (post-sale)	Opening SMS — inform of redemption rights	SMS	§10 Day 1
Day 2	Phone call attempt #1 — pure educational	Phone	RW phone opener (below)
Day 4	SMS — share resource link	SMS	"{{first}}, here's a quick guide on Ohio redemption rights: [link]. {{phone}} if questions."
Day 7	Phone attempt #2	Phone	Reference any prior contact
Day 10	SMS — deadline math	SMS	"{{first}}, your redemption window has ~X days left on {{address}}. Want to talk options before it expires?"
Day until redemption expires	Daily SMS	SMS	"{{first}}, X days left to act on {{address}}. {{phone}}."

RW Phone Opener (Day 2)

"Hi {{first}}, this is {{me}}. I know {{address}} sold at sheriff sale on {{auction}}. I wanted to call because most people in your situation don't realize Ohio gives you a redemption period — meaning you can still buy the property back from the new owner OR sell your redemption rights. I have cash available and I can structure a deal where you walk away with money instead of nothing. Got 5 minutes?"

Key phrases:

- "Most people don't realize" — they feel informed, not pitched
- "Walk away with money instead of nothing" — concrete benefit
- "I have cash available" — establishes capability fast

Solutions to offer in RW conversation

1. **Fund the redemption + buy** — we provide cash to redeem (typically sale price + fees), then buy from them at agreed price. They walk with \$5-30K.
2. **Sell their redemption rights** — even simpler, they assign rights to us, we redeem ourselves. Fast cash for them.
3. **Refer to bankruptcy attorney** — Chapter 13 can sometimes extend redemption / restructure debt
4. **Confirm timeline** — many don't know exactly when their window expires; we help them find out

Critical RW timing notes

- **Tax foreclosure redemption (ORC 5721)** — redemption is allowed up to confirmation of sale (~30 days post-sale)
- **Mortgage foreclosure redemption** — redemption rights end at sale confirmation (typically 7-30 days post-sale)
- **Always verify exact deadline** before structuring offer — court docket or attorney confirms

Escalate to Aaron immediately when

- Lead says "yes, help me redeem"
 - Redemption window <14 days
 - Property has clear equity above sale price (always — that's free money structure)
-

What does Mike's typical day look like?

Morning (9:00-11:00 AM):

- Triage the new daily batch from autonomous run
- Apply each preset filter, work through Day 1 outreach
- Prioritize: Sheriff Sale <14 days first, then LP, then Probate, then RW

Midday (11:00 AM-1:00 PM):

- Phone call windows: respond to morning SMS replies
- Day 2/3 follow-ups for yesterday's Day 1 batch
- Update status tags as conversations progress

Afternoon (1:00-4:00 PM):

- Phone calls for Day 4/7/14 records
- Tag responders, escalate hot leads to Aaron
- Update DataSift status for moved leads

End of day (4:00-5:00 PM):

- Apply Sold Property Cleanup if any deals closed
 - Schedule callbacks for tomorrow
 - Friday only: Weekly Review per [SOP-WEEKLY-REVIEW.md](#)
-

Sequence priority order (when Mike's behind)

If Mike has 50 records to work and only 2 hours, work in this order:

1. Sheriff Sale <14 days to auction (highest urgency)
2. Redemption Window <14 days remaining (next-highest urgency)
3. Sheriff Sale 14-30 days to auction
4. Lis Pendens Day 1 (first-to-market window)
5. Probate Day 1 (less urgent but compounds – empathy demands prompt response)
6. Day 2-3 follow-ups (in order: SS → LP → Probate)
7. Day 7+ nurture cadence

"Options-to-help" snippets Mike can drop into any conversation

Save these as DataSift quick-replies / phone-script snippets:

Open with:

"I'm a local buyer in {{county}} County. Based on where your situation is now, I usually have 3-4 options to share — not all require selling. What's worth knowing for you?"

If they push back:

"Totally fair. Just so you know what's on the table: I can buy as-is in 7 days, OR refer you to attorneys who can buy you time, OR help you understand your rights. I don't make money unless option 1 happens, but I share all of them anyway. What sounds useful?"

If they're not ready:

"No problem. Drop my number — {{phone}} — and reach out if anything changes. I'm not going anywhere."

If they say "send info":

"Will do. Texting you a one-page summary right now. If anything in there raises questions, just reply to this thread. Talk soon."

Tags Mike applies as he works

Tag	When to apply
sms_sent_day1	Right after Day 1 SMS goes out (auto-applied if using DataSift bulk SMS)
sms_sent_day2 , day3	After each follow-up SMS
called_day1 , day2 , etc.	After each phone attempt (even VM)
mailed_day14	After Day 14 mail piece sent
mailed_day60	After Day 60 mail piece sent
responded_v1 / responded_v2	A/B test variants — track which copy converts
requested_info	Lead asked for info — Mike sent summary
callback_scheduled	Lead booked a callback — set the date in DataSift calendar field
interested	Lead engaged positively, mid-conversation
hot	Ready to make offer — escalate to Aaron same-day
not_interested	Hard no — recycle in 90 days
do_not_contact	STOP reply or explicit ask not to contact
bad_data	Wrong number, wrong address — don't waste another attempt

These tags drive the next-day preset filters, so consistency matters.

When to graduate a lead OUT of the cadence

Move to Aaron / closer:

- Tag `hot` → same-day Slack ping to Aaron
- Status changes to `Appointment` → Aaron takes over

Drop the cadence:

- Tag `do_not_contact` → never touch again
- Status `Sold` → Sold Property Cleanup auto-fires
- 90-day recycle complete with no engagement → tag `dead_archive` , drop

Long-term nurture:

- Tag `not_interested` + meaningful reason → quarterly mailer, no SMS/calls
 - Tag `requested_info` + 30 days no follow-up → quarterly mailer
-
